Getting Ready

Connecting a Digital Voice Recorder

Connecting a Digital Voice Recorder DS-2000/DS-3000

Notes

- Make sure DSS Player for Mac is installed (see P.8) before connecting the USB connection cable to a Digital Voice Recorder DS-2000/DS-3000.
- Make sure that the Digital Voice Recorder rear-panel POWER/LOCK switch is set to ON, the Digital Voice Recorder is stopped, and the Hold switch is released before connecting the USB connection cable to the Digital Voice Recorder DS-2000/DS-3000.
- Insert connector A of the accessory USB connection cable into the computer's USB port.

2 Insert connector B of the accessory / A USB cable into the Digital Voice Recorder DS-2000/DS-3000.

Notes

- For information about the computer's USB port, refer to the user's guide supplied with your computer.
- Do not pull out the USB connection cable while a communication session is in progress, or you might corrupt data.

Connecting a Digital Voice Recorder DS-150/DS-320

Notes

- Make sure DSS Player for Mac is installed (see P.8) before connecting a Digital Voice Recorder DS-150/DS-320.
- Make sure that the Hold switch is released and the Digital Voice Recorder is stopped before connecting the USB connection cable to a Digital Voice Recorder DS-150/DS-320.

Connect one end of the accessory KP5 USB cable to the computer's USB port and the other to the accessory RA5 USB adapter.

Connect the accessory RA5 USB adapter cable to the Digital Voice Recorder DS-150/DS-320.

Notes

- For information about the computer's USB port, refer to the user's guide supplied with your computer.

- Do not pull out the USB connecting cable or the USB adapter cable while a communication session is in progress, or you might corrupt data.

Using SmartMedia Adapters

Data recorded on a SmartMedia memory card using a Digital Voice Recorder DS-2000/DS-3000 can be accessed by a computer by using the optional MA-2 digital camera accessory PC card adapter, or the optional FlashPath MAFP-2N 3.5-inch floppy disk drive adapter, or the optional MAUSB-2 SmartMedia memory card reader/writer. When using any of these accessories to access SmartMedia memory cards with a computer, make note of the following tips:

Note

We are not liable for any failures related to SmartMedia memory cards to which data has been transferred or on which data has been edited using any equipment or adapters other than those recommended by us.

Tips on Handling SmartMedia Cards on a Personal Computer

-Do not format SmartMedia memory cards on a personal computer. SmartMedia cards that have been formatted on a personal computer cannot be read or written by a Digital Voice Recorder DS-2000/DS-3000. Format SmartMedia memory cards using a Digital Voice Recorder DS-2000/DS-3000 or a CAMEDIA Olympus digital camera.

-Folder names that have been set using a Digital Voice Recorder DS-2000/DS-3000 or DSS Player for Mac are valid only on a Digital Voice Recorder DS-2000/DS-3000 or DSS Player for Mac. If you move or rename folders or files on a SmartMedia memory card, the files may be reordered or may become unrecognizable to a Digital Voice Recorder DS-2000/DS-3000.

-If audio files that have been recorded on a Digital Voice Recorder DS-2000/DS-3000 using any software other than DSS Player for Mac (

-If you display folders on a SmartMedia memory card on an Apple Macintosh computer (such as an iMac or Power Mac), the available recording capacity of the SmartMedia memory card will be reduced as the computer will automatically create files irrelevant to the operation of a Digital Voice Recorder DS-2000/DS-3000.

Downloading Recorded Audio to a Computer

Memo

The process of transferring audio files to a computer from a Digital Voice Recorder DS-2000/DS-3000 or DS-150/DS-320 is called "downloading."

DSS Player for Mac supports three modes of downloading audio files to a computer, as follows:

-Download selected files

Select one or more audio files and download them to a computer.

-Download a folder

Download all audio files in a folder to a computer.

-Download all

Download all audio files from a Digital Voice Recorder DS-2000/DS-3000 or DS-150/ DS-320 to a computer.

Click the Download icon to download all audio files to a computer.

Instructions for downloading selected files are given below. For information on downloading a folder or downloading all files, browse the Online Help.

Downloading Selected Files

Select a folder

Select the file you want to download in the Device Window. In the figure at right, Folder A has been selected.

9 Select an audio file

Select the audio file you want to download in the Audio File List Window.

To download multiple files, select them while holding down the Shift key. In the figure below, two files have been selected.

E-mailing Audio Files

You can e-mail an audio file as an attachment. To attach an audio file to an e-mail message, follow these steps: For more details on e-mail attachments, refer to the instructions supplied with your e-mail software.

Start DSS Player for Mac.

Start your e-mail software and create a new message.

1 Attach the audio file.

Select the audio file you want to attach in the Audio File List Window in DSS Player for Mac and drag it to the body of the new message in the e-mail software. (Click the file with the mouse pointer and hold down the mouse button, then drag the file to the desired destination and release the button.)

Мето

If your e-mail software does not support the above method, use the software's file attachment function to select a target audio file from the folder containing the file.

By default, audio files are stored on Macintosh HD: DSS Player for Mac: Message Folder: Folder A (or B, C).

Saving Audio Files to a Floppy Disk or Other Storage Media

Choose the Export Filex command from the File menu. Using this command, you can save audio files to a floppy disk or any other storage medium.

Loading Audio Files from a Floppy Disk or Other Storage Media

Choose the Import Files command from the File menu. Using this command, you can load audio files from a floppy disk or any other storage medium so you can play them using DSS Player for Mac.

Rename a Folder

[Audio Folder Window folder name]

Choose the Rename Folder command from the File menu. You can rename folders at you like.

[Device Window folder name]

Choose Rename Folder from the Tools menu and type a folder name.

The names of the folders on the SmartMedia memory card mounted in the Digital Voice Recorder DS-2000/DS-3000 are updated with the new folder names.

Memo

Device Window folder names consist of a string of eight or fewer single-byte alphanumeric characters (except for #\$@[]\-|'^{}) characters.

Converting File Formats

Choose the Convert to AIFF File command from the File menu.

When a DSS file is converted to an AIFF file, unique DSS information such as priority and index marking will be lost.

Note

AIFF files cannot be converted to DSS format.

<<File Formats Supported by DSS Player for Mac>>

DSS Player for Mac supports two file formats: DSS and AIFF.

-DSS format

The format the Digital Voice Recorder DS-2000/DS-3000 uses to record audio files. File names are assigned in the following manner:

DS20 0001.dss

- Extension

— File number: A serial number automatically assigned by a Digital Voice Recorder recorder.

User ID: The name that has been set on a Digital Voice Recorder recorder. The default name on a Digital Voice Recorder 2000 is DS-2000. The name on a DS-320 is fixed at DS64.

The user ID can be modified with DSS Player for Mac ([] see P.28). A DSS file can store about 102Kbps in standard mode and about 47Kbps in long mode. It can contain index and priority settings.

Other Topics

Note

The user name on a DS-150/DS-320 cannot be modified.

-AIFF format

The standard Macintosh audio file format with the aif extension. It cannot contain index and priority settings.

27

Modifying Digital Voice Recorder Date and Time

Choose the Set Time&Date command from the Tools menu, or click the associated icon.

Transfer the computer's date and time to the Digital Voice Recorder DS-2000/DS-3000 or DS-150/DS-320 to modify the Digital Voice Recorder DS-2000/DS-3000 or DS-150/DS-320 date and time.

Note The DM-1 does not support this function.

Modifying Digital Voice Recorder DS-2000/3000 User IDs

To modify a Digital Voice Recorder DS-2000/DS-3000 user ID, choose the Set AuthorID command from the Tool menu. Enter the user ID and click "OK."

Set Author ID
DS-2000 Cancel OK

Мето

The user ID is used in DSS file names ($[]_{\mathbb{F}}$ see P.27) that are recorded on a Digital Voice Recorder DS-2000/DS-3000.

Note

The user ID on a DS-150/DS-320 cannot be modified.
