b.The AF confirmation mark indicating that the focus and exposure are locked remains lit as long as the shutter button is kept depressed.

Halfway down

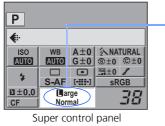

C. Press the shutter button completely to take the

RECORD MODES

Your camera is equipped with multiple record modes, which determine the quality and image size of the pictures you take. Below is a general description of the commonly used modes. For a detailed description of all record modes, refer to the Instruction Manual.

Application	Number of pixels	Pixel count	Compression rate			
			SF (Super Fine) 1/2.7	F (Fine) 1/4	N (Normal) 1/8	B (Basic) 1/12
Select for the print size	(Large)	3648 × 2736	■ SF	Q F	■N	■B
	M (Middle)	3200 × 2400	MSF	MF	MN	MB
		2560 × 1920				
		1600 × 1200				
	S (Small)	1280 × 960	S SF	Ŋ₽	SIN	S B
		1024 × 768				
For small-sized print and website		640 × 480				

You can set the record mode from the super control panel displayed on the LCD monitor. Press the button and use the arrow pad to move the cursor to the record mode. Then turn the main dial (or sub dial) to select the setting.

Image becomes clearer

FLASH MODES

This camera features multiple flash modes. You can select the appropriate flash mode to suit the situation.

You can set the flash mode using the flash button. While holding down the flash button, turn the main dial to select the setting. Setting information is displayed in the viewfinder and on the control panel while you are setting a function.

③/**③**4

AUTO

- Auto-flash The camera decides if the flash is needed. • Red-eye reduction flash - Reduces the incidence of red-eye by
- emitting pre-flashes to shrink pupil size before taking the • Slow synchronization + Red-eye reduction flash - This mode is

SLOW

for SLOW when you want to use slow synchronization, yet also reduce the red-eye phenomenon.

≴ SLOW • Slow synchronization (1st curtain) - The flash fires right after the shutter fully opens.

\$SLOW2/

- Slow synchronization (2nd curtain) 2nd curtain flash fires just **2nd CURTAIN** before the shutter closes.
 - Fill-in flash The flash always fires. Suitable for taking subjects lit from behind by strong light.

• Flash off - The flash is turned off. Suitable for when flash photography is not permitted. In this mode, the flash can be used as an AF illuminator when it is raised.

Manual flash: You can also set the amount of light (FULL, 1/4, 1/16, or 1/64) in the flash mode setting.

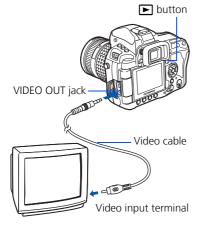

VIEWING PICTURES ON A TV

a. Turn the camera and TV off, and connect the video cable as illustrated.

b.Turn on the TV and set it to the video input mode. For details on switching to the video input mode, refer to the TV's instruction manual.

C. Turn the camera on and press the button.

Note: If the pictures are not displayed, consult your TV manual to set up the video source

HOW TO ERASE ALL PICTURES WARNING - PERFORMING THESE STEPS WILL DELETE ALL STORED PICTURES!

a. Press the **MENU** button. Use **△** ♥ to select [4], then press ().

b.Use to select [CARD SETUP], then press (2).

the
button.

d. Use �� to select [YES], then press the ⊛

E-MAILING A PICTURE

Using the OLYMPUS Master software (included), you can share your pictures with others by using the built-in e-mail feature.

After installing OLYMPUS Master, open the program and click " E-mail" in the toolbar. Select the image(s) to attach to the e-mail within the thumbnail area, and drag and drop them into the register area.

At this time, you can resize your pictures to make them more manageable for e-mail. This helps you stay within the e-mail capacity limitations set by your e-mail provider.

When finished, click the "\sum Launch Mailer" button at the bottom of the window. Your default e-mail program will open, and the selected picture(s) will automatically be attached to a new message.

PRINTING A PICTURE

Using the OLYMPUS Master software (included), you can make prints of your pictures using your own photo printer.

After installing OLYMPUS Master, open the program, click "
Print Menu" in the toolbar, and select "
Photo Print". With "
Photo Print", you can drag and drop the desired image and select a layout to print. "IIII Index Print" allows you to print thumbnails with file information. For detailed instructions, please refer to the "Help" menu in the software.

Alternatively, you can print your pictures by connecting your PictBridge* compatible camera directly to a PictBridge* compatible printer. This permits fast, easy printing without using a computer.

*For detailed instructions on using PictBridge, please refer to your camera's Instruction Manual.

What you can do with OLYMPUS Master software

• The provided software CD includes OLYMPUS Master software for viewing and editing images. Once installed, you can take advantage of viewing and editing your images. For information on how to use OLYMPUS Master software, see Help after installation.

- Install OLYMPUS Master on your computer from the provided CD-ROM. OLYMPUS Master allows you to register as the camera's owner. Doing so will enable you to receive information on software or firmware upgrades from Olympus.
- OLYMPUS Studio Trial Edition is included in the OLYMPUS Master CD-ROM, which can be used for 30 days after installation. You can purchase the license number for the full version from the [Help] menu.
