

M.ZUIKO DIGITAL ED 300MM F4.0 IS PRO AT F4.0, 1/125, ISO 400

THE FIRST
FIXED-FOCAL-LENGTH
SUPER-TELEPHOTO in the PRO

series represents a dramatic example of the portability of Olympus’ award-winning Micro Four Thirds system. Compare it to a 35mm-equivalent 600mm f4.0 lens and the size and weight advantages of the M.Zuiko are immediately obvious. This lens is great for sporting events, wildlife photography, birding and any situation where there’s a significant distance between you and your subject.
