OM-D
E-M5 Mark III

EVERY ASPECT IS
TRANSFORMED
INTO A COMPACT &
LIGHTWEIGHT SYSTEM.

The history of the OM-D series has hinged on redefining mobility for all photographers. This unwavering philosophy comes to life once again with the OM-D E-M5 Mark III. Compact, lightweight, and comfortable - made for roaming the biggest cities to the smallest villages, and even the most remote destinations on Earth.

COMPACT. LIGHTWEIGHT. EXHILARATING.

Roam the planet with a camera system that never gets in your way and frees you to enjoy every moment of every adventure.

WORLD-LEADING PORTABILITY

Each and every part on the E-M5 Mark III has been miniaturized, resulting in an extremely compact and lightweight system delivering superb mobility. As part of the world's most portable camera system, it's 55% smaller and 64% lighter than leading full-frame mirrorless cameras.

LARGE, HIGH-DEFINITION VIEWFINDER

The E-M5 Mark III features a 2.36 million dot OLED viewfinder with a high contrast display that delivers vivid colors. A long eye point has been designed for easy viewing, even when wearing glasses.

WEATHERSEALED CONSTRUCTION

The E-M5 Mark III features a dustproof, splashproof and freezeproof design that can be used for shooting in punishing environments. You can keep your focus where it belongs: on your subject instead of the weather.

AUTOFOCUS

As fast as it is accurate. Capture the most challenging shots with our proven autofocus technology.

121-POINT ALL-CROSS TYPE ON-CHIP PHASE DETECTION AF

The heart of our technologically advanced system is 121-point all-cross type on-chip Phase and Contrast Detection AF. Each AF point is cross-type for reliable vertical and horizontal tracking. It covers the 75% of the angle of view vertically and 80% horizontally for high-precision focusing of fast-moving subjects across a wide range.

AF TARGETING MODES

Accurately capturing your subject is easier with one of six AF Targeting Modes. Group 5-Point tracks moving subjects grouped together closely. Group 9-Point is for moving objects, like an airplane. Group 25-Point focuses on smaller moving subjects, like a flying bird.

30FPS SEQUENTIAL SHOOTING

The E-M5 Mark III gives you highly precise tracking no matter the scene. Our advanced Tracking AF Mode lets you simultaneously shoot and focus on a specific subject. Use Center Priority/Center Start in C-AF to track subjects with consistent movement or rapidly moving subjects.

5-AXIS IMAGE STABILIZATION

Less gear. Greater freedom. Just one of the benefits of shooting with our powerful image stabilization system.

5-AXIS IMAGE STABILIZATION

The E-M5 Mark III features 5-Axis in-body Image Stabilization delivering an astounding 5.5 shutter speed steps of compensation*. The TruePic™ VIII image processor precisely controls the IS unit allowing you to capture crisp telephoto images, clear low-light shots, and smooth 4K video – all handheld.

*Up to 6.5 shutter speed steps of compensation with Sync IS.

GREATER RANGE OF MOTION

The E-M5 Mark III's image sensor, compact image stabilization unit, and large lens mount all work together to allow the image sensor greater range of motion. This provides for more effective image stabilization performance, ensuring sharp handheld shots on-the-go.

HIGH IMAGE QUALITY

The 20MP Live MOS Sensor pairs with the TruePic™ VIII Image Processor, 5-Axis IS, and M.Zuiko lenses to provide the E-M5 Mark III's exceptional image quality, even in low light settings.

PRO TECHNOLOGY

Advanced features at your fingertips ensure your photos and videos are bright, sharp, and beautifully detailed.

WI-FI AND BLUETOOTH

Wirelessly connect the camera to your smart device via Wi-Fi or Bluetooth. Use the free OI.Share app to easily transfer images to your phone for sharing on-the-go.

LONG EXPOSURE MODES

Live Composite Mode records and composites multiple images shot at the same shutter speed, balancing the exposure. Live Bulb and Live Time allow you to choose the mode that perfectly fits the scene.

50MP HIGH RES SHOT

Tripod High Res Shot Mode captures stunning 50MP photos. The image sensor automatically moves in 0.5 pixel increments while taking 8 shots in under a second. The shots are automatically merged together to create one incredibly detailed super-high resolution image.

HANDHELD 4K MOVIES

Just hold the camera in your hand to shoot clear, crisp, smooth 4K video. Go anywhere and capture high-quality video – even in low light settings.

PRO CAPTURE

Pro Capture Mode starts buffering a running series of 20MP images when you press the shutter button halfway. Then, when the shutter is fully pressed, up to 14 frames are retroactively recorded. It's perfect for capturing split-second moments with ease.

CUSTOMIZE

We built it, but make it yours. Customize your settings or create a system of lenses and accessories just for you.

M.ZUIKO LENSES

The E-M5 Mark III works best with our world-class M.Zuiko lenses. There's an M.Zuiko lens for every shooting situation, so as your interest in photography grows, our lenses will keep up.

EXTERNAL GRIP ECG-5

This grip is designed to help you get a tighter hold on the camera and features a convenient shutter release and control dial.

USB CHARGING

Power up your camera's battery (when not in use) with a USB cable for convenient on-the-go charging. Draw power from any outlet or portable power pack.

OM-D E-M5 MARK III SPECIFICATIONS

Sensor Effective Resolution / Type	20.4 Megapixel Live MOS
Processor	TruePic™ VIII Quad Core Processor
Focusing System	Dual F.A.S.T. AF (Contrast & Phase Detection AF) 121-Point (All-Cross Type) On-Chip Phase Detection
Image Stabilization System	5-Axis Image Stabilization with up to 5.5 Shutter Speeds Steps of Compensation and up to 6.5 Shutter Speed Steps Compensation with SyncIS
Viewfinder	2.36M dot OLED Electronic Viewfinder
Rear Monitor	3.0" Vari-Angle Touch LCD
Weathersealed	Dust, Splash and Freezeproof
Sequential Shooting Speed	10fps [H] mode 6fps [L] mode mechanical shutter 30fps [H] mode 10fps [L] mode silent electronic shutter
Special Features	50MP Tripod High Res Shot, Cinema 4K Video, 30fps Silent Electronic Shutter, Pro Capture, Focus Bracketing & Focus Stacking, 1/8000 Sec. High Speed Mechanical Shutter, Wi-Fi & Bluetooth
